

## DEVOPS ENGINEER

**Location:** Geneva (on site)

**Are you ready to take your career to the next level?**

**Do you thrive in environments that challenge and inspire you?**

**Would you like to grow within a team that values both excellence and enjoyment at work?**

Taleo Consulting is an international management consulting group with offices in **France, Luxembourg, Belgium, The Netherlands, Switzerland, Spain, Singapore, Portugal, and Italy**.

We've grown into a team of **450+ talented professionals** across **10 offices worldwide**, partnering with leading organizations in **Financial, Life Sciences, Retail, and Energy** - Sectors, to drive transformation and deliver lasting impact.

At Taleo, you'll find more than just a job. You'll join a community of ambitious consultants who share a passion for growth, innovation, and teamwork. Together, we create an environment where you can develop your skills, take on new challenges, and truly make a difference.

### What Will You Do?

At Taleo Consulting, we believe that **our growth starts with our people**. When our consultants thrive, so do our clients.

Motivated, curious, and passionate professionals make a real impact, not only on their own careers but also on the success of the organizations they support.

We're looking for individuals who **embody our values** and help us foster strong, trust-based relationships with both our **clients** and our **teams across the globe**.

Our success is built on the **talent, collaboration, and commitment** of our people and we're now looking for a **DevOps engineer** to join our journey.

Your role:

- Designing, building and securely managing cloud infrastructure on AWS such as EKS cluster, using best practices for performance, security, scalability and cost optimisation.
- Building and managing CI/CD pipelines across various environments, guiding code through each stage of the software development lifecycle.
- Building, maintaining and sharing templates for the capabilities used in the platform such as CI/CD pipelines and Terraform infrastructure as code (IAC).

- Monitoring system performance, troubleshooting issues and implementing solutions to ensure high availability and reliability.
- Drafting and maintaining comprehensive documentation of infrastructure configurations, roll-out pipelines and DevOps best practices to ensure consistency for your team.
- Working in an agile team environment, meeting changing business requirements.
- Owning your projects/initiatives from start to finish, showing decisive leadership, and defining the vision together with your Product Owner.

Technical profile:

- Experience in a DevOps Engineer role, or a comparable software-engineering position.
- Passion for and experience in building resilient, secure and scalable services.
- Experience with public cloud providers (e.g. AWS), especially with multi-tenant architectures.
- Proficiency in Git, Git workflows and infrastructure as code (IAC), using tools such as Terraform.
- AWS, Kubernetes, Terraform certification; would be a plus.
- Strong scripting and automation skills.

We attract top talent and empower them with the right environment to excel and drive collective success.

#### Why should you join us?

By joining Taleo, you'll become part of a **talented, international, and dynamic team**.

You'll benefit from **real career growth opportunities**, continuous learning, and the chance to build **long-lasting relationships** across borders and industries.

If you recognize yourself in this description and are ready to grow with a company that values ambition, collaboration, and excellence, let's connect.

**Share your CV and take the next step in your journey with Taleo**
