

DevOps Engineer

Location: Geneva

Are you ready to take your career to the next level?

Do you thrive in environments that challenge and inspire you?

Would you like to grow within a team that values both excellence and enjoyment at work?

Taleo Consulting is an international management consulting group with offices in **France, Luxembourg, Belgium, The Netherlands, Switzerland, Spain, Singapore, Portugal, and Italy.**

We've grown into a team of **450+ talented professionals** across **10 offices worldwide**, partnering with leading organizations in **Financial, Life Sciences, Retail, and Energy** - Sectors, to drive transformation and deliver lasting impact.

At Taleo, you'll find more than just a job. You'll join a community of ambitious consultants who share a passion for growth, innovation, and teamwork. Together, we create an environment where you can develop your skills, take on new challenges, and truly make a difference.

What Will You Do?

At Taleo Consulting, we believe that **our growth starts with our people**. When our consultants thrive, so do our clients.

Motivated, curious, and passionate professionals make a real impact, not only on their own careers but also on the success of the organizations they support.

We're looking for individuals who **embody our values** and help us foster strong, trust-based relationships with both our **clients** and our **teams across the globe**.

Our success is built on the **talent, collaboration, and commitment** of our people and we're now looking for a **DevOps Engineer** to join our journey.

The DevOps Engineer is responsible for designing, implementing, and maintaining the infrastructure and production operational processes that enable the product team to deliver value quickly, reliably, and securely. They work across the entire product lifecycle, collaborating closely with the PM, Tech Lead, and Software Engineers to bridge the gap between development and production operations, engaging with the SA during the strategy and discovery phase, and working consistently with the BA, TA, and infrastructure teams. The DevOps Engineer champions best practices in automation, monitoring, incident management, and system optimization. They ensure the product is scalable, capable of

reliably handling production-level data volumes and workload, secure, production-ready, and remains stable and available at all times, both from initial deployment and throughout upgrades.

How do we imagine our future DevOps Engineer?

- Automate code deployment to production.
- Design and manage the technical architecture.
- In collaboration with the TA, guide software engineers on production operational challenges and product observability, e.g. relevance of logs.
- Monitor and ensure platform operability and efficiency.
- Diagnose and resolve production issues, both proactively and reactively (L3 support), within a defined SLA.
- Ensure environments are reliable, scalable, reusable, and secure.;

We attract top talent and empower them with the right environment to excel and drive collective success.

Why should you join us?

By joining Taleo, you'll become part of a **talented, international, and dynamic team**.

You'll benefit from **real career growth opportunities**, continuous learning, and the chance to build **long-lasting relationships** across borders and industries.

If you recognize yourself in this description and are ready to grow with a company that values ambition, collaboration, and excellence, let's connect.
